

Information on “REACH”

Information on the regulation “(EC) No. 1907/2006 for the Registration, Evaluation, Authorisation and Restriction of Chemicals” (Registration, Evaluation, Authorisation and Restriction of Chemicals - REACH)

The REACH regulation requires that all chemical substances produced in quantities of more than one tonne per year are pre-registered or registered before they can be approved for distribution in the European Union.

Döbrich & Heckel GmbH & Co. KG does not produce any substances affected by this regulation.

We only sell products which are defined in a chemical-legal sense as “products” and not “substances” or “preparations”, in accordance with TITLE I, CHAPTER 2, Article 3 “Definitions”. According to the requirements of the REACH regulation, D&H is a downstream user and not subject to REACH registration requirements.

Furthermore, we can also confirm that no products produced by D&H contain substances in concentrations that exceed the permitted limit values laid down by “ECHA” (European Chemicals Agency) in its so-called “Candidate list” of “Substances of Very High Concern” (SVHC).

Nevertheless, in the mutual interest of ourselves and our customers, D&H keeps a register of hazardous substances, in which the annual quantities of chemicals used are recorded and continuously updated.

Please do not hesitate to contact us should you have any further queries.
