Information on “RoHS”

The old EC Directive “2002/95/EC (Restriction of Hazardous Substances - RoHS)” has been replaced by EU Directive “2011/65/EU (RoHS 2)”.

The comprehensive substance restrictions of the new directive have been implemented in national legislation in Germany with the “Verordnung zur Beschränkung der Verwendung gefährlicher Stoffe in Elektro- und Elektronikgeräten (Elektro- und Elektronikgeräte-Stoff-Verordnung - ElektroStoffV)”. “ElektroStoffV” came into force on 19 April 2013.

We, Döbrich & Heckel GmbH & Co. KG, ensure conformity as per “ElektroStoffV” and “RoHS 2” in accordance with the use of our products for their intended purpose.

Our suppliers were and are integrated into this continuous process. Our operating manuals were and are promptly adapted to new requirements.
